IMPORTANT MEETING OF C. E. SOCIETY OFFICERS

A Statement of Past Season's Work Art Editor North Explains to Crowd
and Finances was
Made

ENGINEERING PAPER DISCUSSED

Important Amendment to Constitution
of Society to be Made

A meeting of the recently elected officers of the Civil Engineering Society was held last Tuesday afternoon and after stating the reasons for the meeting, President Powell gave a resume of the work of the Society during the past year and the financial condition at the present time.

The advantage of an early start in its work, by the Program Committee was pointed out and the hope was expressed that the members would do as much as possible during the summer so that the program for the coming year might be completed as nearly as possible by the time the fall term opens. It was the opinion of the officers that the Vice-President should be Chairman of the Program Committee, and an amendment to the Constitution to that effect will be made as soon as possible.

Meetings will be held every two weeks if possible. Smokers and dinners will alternate with afternoon meetings. It is hoped that the members of the Society will take advantage of all opportunities this summer to get information and photographs of interesting engineering work which they may see. It is hoped to have papers and illustrated talks by the member during the year.

The advisability of publishing a magazine was discussed thoroughly. It was deemed inadvisable to publish a journal monthly. If the co-operation of the other professional societies could be secured an engineering journal might be successfully undertaken and published either monthly or bi-monthly.

IN THE LIMELIGHT

Don't fail to purchase a bunch of the Special BUSINESS LAW Issues of *The Tech* to-morrow. We guarantee you will pass if you buy one. All our Students passed last term.

Did you know that Basket Ball had been canned at the Institute for next year? Well, I guess that there is no other way out of it than to "mosey along" with Track and Hockey with a couple of Burlesques known as Class Basket Ball games thrown in.

Well, the crew failed to get their desired insignia. Cheer up, better luck next time.

How are you coming out this year?

The "Tech" board for next year will be announced at the Annual Banquet Friday night.

The Tech will suspend publication with Saturday's issue. A resumption will be made during Senior Week.

TECHNIQUE 1913 ART COMPETITION STARTS

Art Editor North Explains to Crowd
of Men, the Rules of
Competition

At one-thirty yesterday afternoon, R. H. North, Art Editor of TECHNIQUE 1913, addressed a group of Sophomores and a Freshman on the rules governing the art work of next year's TECHNIQUE.

The size for the full page drawings is 4 3-4 inches by 6 1-2 inches. For the headings, the size is to be 1 1-2 inches by 4 3-4 inches.

Art Editor North gave some hints to the style of drawing preferred. The cuts should be as simple as possible—poster style in fact—with heavy lines so as to reproduce well.

He then explained to the 1913 men the rules governing the competition for the Assistant Art Editorships, two to be elected. For the competition, a full page heading for either "Athletics," or "Junior Week" may be made. This is to be in line work entirely, black ink on white paper.

These pictures are to be sent to R. H. North, R. F. D. No. 3, Oxford, Maine. No cuts bearing a post-mark of later than June fifteenth will be considered in the competition. All 1913 men are eligible to compete. Art work may however be sent to the Art Editor by men of any other class.

M. E. SOCIETY TO HAVE PINS

First Student Branch of the A. S. M. E.
To Have This
Privilege

The Mechanical Engineering Society have finally succeeded in obtaining a pin to be worn by the members. The M. E. Society at the Institute, which is a branch of the A. S. M. E. is the first student branch of the American society to have the privilege of wearing the society's insignia. The pin designed by Foster Russell 1911, is a shield shaped affair with a narrow gold border. In the center is the regular four leaf clover of the A. S. M. E. Above this design are the words student section and below it, M. I. T. in a dark red back ground. A careful list is to be kept of all men purchasing pins as they are to be worn only by regular members of the M. E. Society. The pins are \$1.00 each with a safety clasp.

CONFERENCE SYSTEM DEvised AT LEHIGH

Competent Teachers Give Assistance
To Students Who are Deficient
in Their Studies

TUTORING AT COST

The Aim is not to Keep the Imcompetent
in College, but the Unfortunate

Lehigh University has recently devised a scheme for helping out lagging students and preventing them from having to pay extortionate prices for coaching. A separate department in charge of several members of the faculty holds evening sessions for consultation with students seeking assistance. The idea is not so much to enable the student to pass an examination as to put him on his feet and help him to handle his work unassisted by giving him a better knowledge of methods of study and the best way to accomplish his work.

President Drinker's explanation of the system is substantially as follows:—

"Lehigh believes in a policy of so limiting the number of her students that special care may be given to each man. She believes in trying to keep men in college when they have been once deemed fit to enter, and while eliminating those who, after trial, are proved to be not of college timber, in giving every reasonable aid to the man who may be in need of temporary aid or encouragement.

"We all know of and probably all disapprove of the coaching schools and systems involving payments of from \$1.00 to \$5.00 an hour for cramming to pass a quiz or examination. While it is probable that assistance will always be needed and sought, it is very important that all help be given in such a way as to increase the student's power of independent study and not to weaken his self-reliance, and that only that amount of assistance be given him to enable him to regain his grasp and then go on by himself. To best deal with this problem, we have instituted here at Lehigh what we call our conference department, which we believe to be the way to accomplish the best results for both the students and faculty.

"The director of the department is an experienced teacher, a professor of mathematics, and a man having a strong personal, sympathetic interest in students. Able, mature teachers from the departments of physics, chemistry, and modern languages represent those subjects in the conference school, which sits on Monday, Tuesday, Thursday, and Friday evenings from 7 to 9 for consultation with freshman or sophomore who desires aid in mathematics, physics, chemistry, and modern language.

"The school is run at cost, the charge for the four full sessions being \$1.50, and the school sits on Wednesday and Saturday afternoons from 2 to 4 free of charge for the benefit of those students who can not afford to pay even the above nominal charge. The great advantage is that the student is not aided by an outsider, but by a competent teacher engaged in the same subjects in which the aid is sought. The aim is not to carry along lazy and incompetent students to put on his feet a worthy man after a fall!"

It was rather hot work in the Armory yesterday.

Don't be late to the TECH Banquet or you'll miss all the excitement. 6.30 is the time, the New American House, the place; no girl.

FINAL BANQUET OF E. E. SOCIETY AT THE NOTTINGHAM

Mr. Elihu Thompson of the General Electric Company to be Chief Speaker

VARIOUS STUNTS BY MEMBERS

A Good Time and an Excellent Menu for all Those Who Attend

The annual banquet of the Electrical Engineering Society will be held this evening at the Hotel Nottingham. This affair promises to be the greatest social success of the year. The committee in charge of the entertainment has been putting forth their utmost diligence and sagacity in making elaborate plans for the affair. The committee has been most fortunate in securing as the special guest of the evening, Mr. Elihu Thompson, of the General Electric Co., in Lynn.

Mr. Thompson has been for years an electrical engineer and has been very successful in this line. He was the founder of the old Thompson-Houston Electric Company, which is now the General Electric Company of Lynn, one of the greatest companies of its kind in the world, its center being at Schenectady, N. Y. He was at one time president of the American Society of Electrical Engineers.

The subject which Mr. Thompson has chosen has not yet been announced, but he will be sure to speak on something that will be of great importance and interest to prospective electrical engineers.

There will be other interesting stunts that will take place. "Charlie" Barker, who hails from Marlborough, has a stunt entitled "Me and Minnie," which is sure to cause a great deal of merriment. Darrow will probably do a gymnastic stunt, and Fryer will be there with some red hot stories. Barton will ask a few of his famous questions and Dennis will tickle the ivories with a few chords.

President L. P. Ferris, of the Society will be the toastmaster of the evening. The dinner will start at 6.30 sharp. A good dinner is promised by the management of the Nottingham, and the menus will arrive on time.

Tickets are still on sale at \$1.25 each, and may be obtained from any of the following men:—L. P. Ferris, D. P. Sailhard, H. Fryer, O. B. Dennison, 1911, J. L. Barry, H. D. Kemp, P. L. Flansburg, 1912.

At the University of Washington, there is a senior eighty years old.

The regents of the University of Missouri have voted to abolish all inter-collegiate athletics after next Fall.

Subscriptions within the Boston Postal District and outside of the United States must be accompanied by postage at the rate of one cent a copy.

Printed by Maugus Printing Co.,
Wellesley, Mass.

To-morrow's TECH will be invaluable to all men who are taking the Subject of Business Law. Through the kindness of Mr. Albers, the Lecturer in that subject, *The Tech* will publish to-morrow the Business Law Final Examinations given for the past four years. This will give the class a chance to find out what sort of an examination they may look for a week from Monday morning. *The Tech* can not give positive assurance that the Exams contain the same questions that the coming exam will, but take our advice and buy one just the same. This is inside information and don't fail to take advantage of this tip. The edition on this will be limited, so come early and avoid the Rush. Not more than ten copies to a customer.

LAST CALL FOR THE TECH'S DINNER

George B. Gavin of the Boston Globe,
Prof. A. T. Robinson and P. A.
Ballou to Speak

All who intend to attend the Annual Banquet of *The Tech* must sign up on or before noon to-day, as all who have not signed up on that time will be counted out Friday evening. The banquet will begin promptly at 6.30 p.m. in order to get through early and thus not interfere with anyone's work or any other engagements. The price to those eligible, as per list in the lower office, will be fifty cents, all others \$1.50. Mr. Sullivan, the City Editor of the *Globe* finds it impossible to be present on account of a previous engagement, but the Committee have been very fortunate in securing in his place, Mr. George B. Gavin, assistant Day Editor of the *Boston Globe*, who can tell many interesting tales of Newspaper Life. The other speakers will be Prof. A. T. Robinson, of the Institute Faculty, and P. A. Ballou, of the Maugus Printing Co. All come and make this the biggest Annual Banquet in years.

BIGGEST MOTOR EVER BUILT

Single Cylinder Two-Cycle Motor That Develops 1200 H. P.

A Carel Diesel single-cylinder single-acting two-stroke motor has just been finished capable of developing 1200 horsepower. The size of this cylinder is enormous; some idea of the size can be had from the fact that the distance from the floor to the cylinder cover is 16 feet.

Although this 1200 h. p. motor works on the two stroke principle, there is a cam shaft, which runs, of course, at the engine speed. There are four valves for air starting, ordinary air inlet, fuel injectors, and exhaust. The diameter of the crank pin is about two feet.

This is the type of motor that Vickers Sons & Maxim, Ltd., of Barrow-in-Furness England, are building by the many thousands of horse power for the British Navy. The single cylinder just described was built for testing purposes.

ANNUAL BIOLOGICAL DINNER ANNOUNCED

Several Prominent Speakers Secured Prof. Sedgwick Talks on London Water Supply

On Thursday night, the Biological Society will close the year with a banquet which promises to equal the farewell dinner to Prof. Sedgwick.

The usual attractive program will be given and some of the events will prove very surprising and interesting. After the dinner, many prominent professional speakers will be introduced and should prove equally instructing. Prof. Sedgwick will be the last speaker, his subject dealing with the London water supply that he was interested in last summer. Much interest is displayed by the members in this subject and Prof. Sedgwick will, therefore go into details. At this meeting, the annual election of officers will also be held.

The Wright Brothers are lending an aeroplane motor to the aeronauts of Michigan for experimental purposes. Undergraduates have already constructed several types of planes and the motor is to be tried in each one to test their relative merits. Prizes will be given the most successful machines.

Owing to the inability to stay within a moderate limit, University of Pennsylvania students have been forbidden to play poker, under pain of expulsion.

The Students' Bank at Columbia has deposits amounting to \$18,000 from the student body at Columbia.

They wear longer.

Students of Civil Engineering

You should read the ENGINEERING RECORD in connection with your studies.

It describes engineering works which exemplify the best practice in design and construction.

It will keep you in touch with the work of the leaders in all branches of civil engineering and construction.

It will make clear the practical applications of the engineering principles you are studying.

The RECORD is devoted exclusively to subjects of interest to civil engineers.

Its volumes contain an immense amount of valuable technical and practical information on engineering work.

You should have this information on file for future reference. Some day you will need it in your work.

The Engineering Record is published weekly

at \$3.00 a year

Over 2000 Pages of Reading Matter Per Annum

Special Student Rate, \$2.50 a year
